

DaWanda is the leading European market place for handcrafted goods.

A trailblazer for high quality craft businesses and shops in Europe, DaWanda is the voice to boost awareness of unique crafts and DIY work.

DaWanda was founded in 2006. Today, more than 1.6 million registered users can choose from a selection of over 2 million products, listed by 130.000 individual shops.

Our main categories are fashion, accessories, bags, jewellery, baby & children, home & living and supplies.

You have worked with Ruby on Rails in large scale production environments for at least 3 years and know a minimum of one other programming language in depth? You are a team player who knows how to integrate with many different technologies and APIs, not only from the Ruby land?

Join us as

## **SENIOR DEVELOPER (m/f)**

### **Your Responsibilities:**

- Work in a flat hierarchy SCRUM team
- Plan and develop new and refactor existing features
- Work closely together with our product management team
- Integrate new technologies and third party APIs
- Conduct tests with RSpec

### **Our Requirements:**

- A minimum of 5 years professional experience in software development
- Solid Ruby and SQL knowledge
- Significant experience with Ruby on Rails and at least one other web framework
- Knowledge of a technology stack that includes Rails, Solr, Memcached, Redis
- Experience with handling the Amazon Web Services or similar technologies
- Knowledge of how to scale large environments in peak times

### **Our Offer:**

- A dynamic, creative, and cooperative start up environment
- The possibility to work with state of the art technologies and develop relevant skills
- Room for personal and professional development
